Construction

The hulls, the deck, the cockpit are built on a female mould and made of fiberglass and sandwich with 15/40 mm PVC and 75 kg/m³ density, worked and glued with isophthalic polyester resin.

The gel-coat used is of first choice neopentilic type, ice white, Ral 9003.

The interior wood is made of Okumè marine plywood.

The transoms are made of fiberglass and polyester resin.

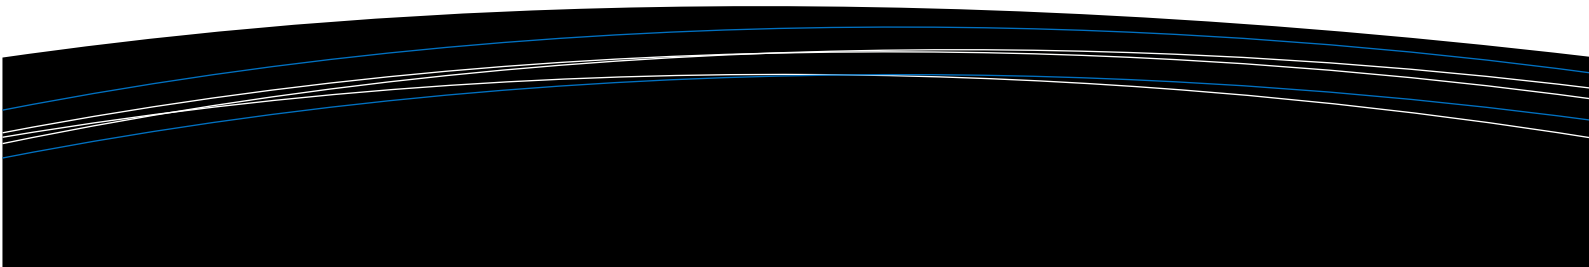

Cockpit and deck

Stern door on steps with access to rudder rooms
Raised fiberglass driving console with vtr top attached
6 seats 10 seats in fibreglass
Hydraulic steering system with stainless steel wheel 380 mm
Navigation compass
Electrical panel with 8 magnetic switches
2 batteries of 140 Ah
Charge divider two inputs-two outputs
Switch for battery coupling
8 electric bilge pumps
2 manual bilge pumps
4 brushes 600*600 mm in anodized aluminium for access to hulls
6 300 mm stainless steel mooring cleats
2 stainless steel ladder to the stern
1 stainless steel windlass 700 W, delta anchor 16 kg chain 35 m

Engine

2 50 Hp diesel inboard engines
Electrostop
Sail drive with fixed tripala propellers
2 alternators battery charging 115 Ah
Water filters - sea
2 analog control panels
Commands bileva
2 diesel tanks in polyethylene 200 l
2 water separators - diesel
